

Finally... a hearing device that people actually want!

Do you have difficulty understanding what people say in noisy situations?

Introducing Delta

A new concept in hearing care, Delta features the most advanced technology available in a never-seen-before design. Weighing less than 2 grams, Delta is so small that no one will notice it. But while Delta sits comfortably and discreetly behind your ear, its outstanding performance will leave you totally free to enjoy your new world of speech understanding.

- Unique, 21st century design
- Virtually invisible
- Most advanced technology
- Available in 17 colours

Oticon ♦ Tego

No matter your age, it's good to be able to hear - and Tego is built to help you do it. It offers an array of advanced sound processing features, all of which are automatically controlled by the unique DecisionMaker system. With Tego you don't have to think about your hearing aid when it's on; all you have to do is to listen and enjoy excellent sound quality wherever you go.

DON'T MISS OUR 2-DAY SPECIAL EVENT OPEN HOUSE ON MONDAY JUNE 12 & WEDNESDAY JUNE 14, 2006

Erin Squarey, M.Sc., Aud(c),
Reg. CASLPO
Audiologist, Oticon Canada.

Hearing Sciences is hosting a Special 2-Day Open House at their **NEW LOCATION** from 8:00am to 4:00pm on Monday June 12 and Wednesday June 14, 2006. Erin Squarey, an Audiology representative and Karyne Steele from Oticon Canada will be at our office to demonstrate 2 new hearing instruments - the automatic **Tego** and the revolutionary **Delta** which is the smallest hearing aid made.

This is an opportunity to hear for yourself the difference this revolutionary technology can make. If you think you or a loved one has a hearing loss, don't miss this opportunity to receive professional advice. Call us to schedule a **no obligation, preferred appointment** for a complimentary hearing assessment and a complimentary demonstration at this 2-Day Open House. Space is limited!

Karyne Steele
Trainer, Oticon Canada.
