Building Canada recognizes smaller places

From page 10

The new national infrastructure plan. The framework agreement signed between the province and the federal government will provide British Columbia with \$2.2 billion over seven years to invest in roads, bridges, tunnels, ports, public transit and more, including the Pacific Gateway initiative, which is key to ensuring that B.C. and Canada benefit from burgeoning economic activity in the Asia-Pacific region.

Building Canada also recognizes smaller communities across Canada. It includes a Communities Component which will support projects that contribute to the ongoing development of safety and strong communities and will be evaluated on the extent to which they meet environmental, economic, and quality of life objectives. This will significantly help smaller communities address their infrastructure pressures and serve as a complementary instrument to Gas Tax Funding (GTF) funding.

Our government understands that modern, world-class infrastructure supports economic growth and productivity, improves Canada's competitiveness, and facilitates the movement of people and goods and this is why we have invested in this plan. Furthermore, the plan will restore public confidence and trust, as well as produce results in areas that matter most to Canadians such as roads and highways, public transit, bridges, sewer and water systems, and green energy.

The Building Canada Plan is about investing in our country's future. Furthermore, it is about a stronger economy, a cleaner environment, and more prosperous communities across Canada, which are priorities for all Canadians. I look forward to Ontario signing on to the new national infrastructure plan.
